PROFESSIONAL SUMMARY

Frontend Developer with 1+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Skilled in component-based architecture, reusable UI development, and state management with Zustand, with hands-on experience integrating secure REST APIs and role-based authentication. Focused on clean, maintainable code and responsive, enterprise-grade interfaces, working in Agile teams with Git and CI/CD workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling / UI: Tailwind CSS, Material UI, Bootstrap, Responsive Design

State Management: Zustand, React Context

API & Auth: REST APIs, Axios, Authentication, Role-based Access Control

Backend / Data: Node.js, Express.js, SQL, MySQL, MongoDB

Tools & Practices: Git, GitHub, CI/CD, Postman, VS Code, Chrome DevTools, Agile

TECHNICAL EXPERIENCE

Frontend Developer

Aug 2025 – Present

Brilliantech Software Pvt. Ltd. Baner, Pune

- Developed and maintained responsive, production-grade web applications using React.js, Next.js, and TypeScript for enterprise clients.
- Built reusable UI components and optimized frontend performance, improving maintainability and delivery speed across projects.
- Collaborated with cross-functional teams in an Agile environment, using Git and CI/CD workflows to ship features and resolve issues.

PROJECTS

VMS — Vendor Management System

Tech Stack: Next.js (App Router), React.js, TypeScript, Tailwind CSS, Zustand, Axios, React Hook Form, Zod, REST APIs, Git

- Built the web interface for a platform that helps businesses manage vendors — from sign-up and document checks to ongoing tracking — with role-based access for five types of users.
- Created an easy vendor sign-up flow (business, bank, and document details) with input validation, plus a secure login that keeps users signed in safely and logs them out automatically.
- Built dashboards where admins can review and approve vendors, track changes, and download Excel reports.
- Added live updates, global search, and favorites, and made the whole site work smoothly on both mobile and desktop.

Recruit Management System

Tech Stack: Next.js (App Router), React.js, TypeScript, Tailwind CSS, React Hook Form, REST APIs, Git

- Built and launched a live recruitment website, including a blog and case studies, designed to rank well on search engines.
- Created a job application system for candidates and employers, with resume uploads and automatic, professionally designed confirmation emails.
- Added instant job search, one-tap WhatsApp contact, and Google Maps directions, and set up SEO so the site is easier to find on Google.

Bot Builder — Low-Code Chatbot Platform

Tech Stack: React.js, Next.js (App Router), TypeScript, Tailwind CSS, Zustand, React Flow, Axios, REST APIs, Git, CI/CD

- Built the web interface for a low-code chatbot platform that lets administrators create chatbot workflows using a simple drag-and-drop tool.
- Created reusable, responsive building blocks for the interface, making the platform easy to extend and quicker to add new features to.
- Connected the interface to secure services and added login and access controls so only the right users can reach each part of the app.
- Improved the app's speed and smoothness by organizing the code well and making sure the screen updates efficiently.

EDUCATION

Bachelor of Engineering
